

- This slide shows the usage of colored blocks.

## Standard block

- Nested item environments become smaller.

## Example block

- Nested item environments become smaller.

## Alert block

- Nested item environments become smaller.

Blocks without titles are also useful.

Now this is a frame with a really long title not fitting on one line

---

Note that ist-beamer breaks the long title line and adjust the blue separating line accordingly.

# Using transparent overlays

- Shown on the first slide
- on the second slide

Blocks can also be covered transparently.

- See the latex-beamer documentation for more information on overlays.

- Shown on the first slide
- on the second slide

Blocks can also be covered transparently.

- See the latex-beamer documentation for more information on overlays.
